**EDUCATIONAL TECHNOLOGY SOLUTIONS DESIGNED
TO BENEFIT INDIA'S CHILDREN**

Houston, Texas (August 24, 2009) – www.COMPUTEREXPLORERS.com (CE) a worldwide company which specializes in children's educational technology, is launching its classes for students ages 3 & older in India. Under the guidance of new master licensor Brijesh Bakhda, computer curriculum and services will be offered at preschools, childcare centers, elementary schools and community sites.

Bakhda, whose friends and family ties are in India, is a businessman active in the UK, Dubai and Africa. "The more I found out about COMPUTER EXPLORERS, the more interested I became," he stated. "It's a wonderful product, and I see a need for something like this in India."

"Brijesh Bakhda is a welcome asset to our educational technology network," reports Deb Evans, President and CEO of COMPUTER EXPLORERS. "With Brijesh's commitment to excellence in education, children and school staff in the Mumbai community, and eventually all of India, will have access to the finest tools and instruction for gaining valuable technology skills."

"I believe that computers and technology peripherals should be used as learning tools," said Bakhda. "Technology skills are fundamental in ensuring children's future success; the employment of active discovery learning in the COMPUTER EXPLORERS program is an exciting way to build enthusiasm for using technology in creative ways."

About COMPUTER EXPLORERS:

COMPUTER EXPLORERS provides educational technology classes to benefit children and staff at preschools, private and public elementary schools and community sites worldwide. Founded and managed by educators, the company has created hundreds of technology lesson plans and instructional tools since 1984. The company is an active member of the ISTE 100, the International Society of Technology in Education www.iste.org, and sponsor of Little Clickers, a publication of Children's Technology Review www.childrensoftware.com.

The COMPUTER EXPLORERS early childhood program provides computer classes for children ages 3-5, foreign language and cultural exploration, and reinforcement of reading, math, science and social studies beginning skills.

The COMPUTER EXPLORERS program for schoolagers offers a turn-key technology program for public and private schools, as well as after school and summer camp programs teaching robotics, engineering, digital movie-making and video game design.

In addition to domestic classes, the company offers courses through its business owners in the United Kingdom, Malaysia and Australia.
